

HTC Desire vs. Samsung i9000 Galaxy S

Orange has confirmed that due to unprecedented demand the HTC Desire will be in short supply across all channels (including direct) until further notice.

We'll keep you updated with any stock developments, but in the meantime where does that leave you if your customers are hankering after the latest HTC? Ask them what it is about the HTC Desire that they particularly want. Do they want the latest HTC device? Do they specifically want the Android 2.1 OS?

There is an alternative that pretty much matches the Desire in terms of features and functionality – the Samsung i9000 Galaxy S. Here's how the two compare:
